CONFERENCE MANAGEMENT SOFTWARE

E-Posters

'A greener way of presenting posters'

Attendee Interactive's E-Poster technology is a revolutionary solution to the costly, labour intensive and often time consuming process of scientific posters. Through the use of our technology, E-Posters are uploaded, viewed and managed online reducing time, exhibit space and easel rental fees associated with traditional poster presentations. Clients are able to track attendee usage to ensure proper return on your investment.

In addition, attendees can email each poster – in PDF format– to their own or a colleague's email address for further study or follow up, enhancing communication between attendees and presenters, providing the opportunity for virtual discussions or face-to-face meetings during and after the meeting.

"Our attendees were stunned by how functional and efficient we made our poster presentations."

-Johnnie White, CMP,
Director of Meetings and Conventions,
Cardiovascular Research Foundation.

- Built-in communication tools
- Track presentations
- Collect evaluations and surveys
- Promote Late Breaking Posters
- Ability to accommodate more presenters without additional costs.
- Lower space rental and printing costs
- Secure Log-ins
- Extend the Life of your Posters

E-Posters Module

Event managers love Attendee Interactive's E-Poster technology because it makes managing posters so much easier and more efficient. The E-Poster Component includes an online poster submission and approval system—prior to your event, presenters upload their posters into our database system. You will know who has submitted papers and what they have submitted, and you can send reminder emails or updates with a click of your mouse.

E-Poster's easy-to-use functionality allows attendees to access all posters at any time during and after the event. Attendees are able to search the database by author, specific text, abstract number, or category to find the research which interests them most.

Audio E-Posters Feature

Multimedia displays have become a driving force in today's marketplace. Make your presented or award winning posters particularly exceptional by allowing presenters to add audio and video to their presentations.
